課程簡介 COURSE SUMMARY

“Queer” at the very beginning was a very derogatory term specifically for LGBT people. Yet, LGBT community later bestowed a positive meaning to this term. “Queer,” in today’s society isn’t solely related to sexuality. It represents a countercultural power that refuses any forms of rigidity. This workshop selects a series of films about LGBTQ community in various time periods. These films deal not only with struggles of LGBT members with the society but also with those within the community itself. If the idea of “queer” isn’t about “abnormal” sexualities, what else is it related to, or, what else is being challenged?
